"A plausible explanation."

from the Buffalo News.

Just So. from the Boston Transcript. "What's a good thing for a black eye?"

ACROSS THE YEARS.

My love for thee began-I dream When, along bleached Ionian shore I, shackled fast to seat and beam, Doomed 'neath the lash to tug the oar First saw thy face, 'mid battle's din Egyptian thou—and our dread foe— Thy cohorts dealt us blow on blow The waves gushed in; we sank, and so

Beneath Venetian skies-I dream-I met thee next; and face to face I caught thine eyes' most glorious beam And trembled, faltering, at thy grace. You could not know my heart and I, For I was at the Doge's feet; War was proclaimed with ire and heat, I bore my weapons to the street

I died in all my sin.

Content for thee to die. When next I saw thee? Let me dream. (For love and dreams have led me far) Twas that day when we crossed the stream To rout the foes of good Navarre. I served for glory, not for fee, I sought to win the victor's crown; I led in taking town on town, And, when at last, they struck me down

Centuries roll! Yet, still I dream-I dream that now you hold me dear; I thought to-day your eyes did gleam When you beheld me near. My strength still holds; still firm my will; Equal in place, I come to thee To dream no more. The years to be

I died, in truth, for thee.

Shall chime to our love's harmony

My heart is constant still!

HECTOR FULLER.

AT THE HOTELS.

"A strongly financed syndicate, calling itself 'The One Kitchen House Company,' has been started in Berlin, with the object of building houses in which every flat will be served by a common kitchen, said George S. Jaeger, an architect, of

Berlin, who is at the New Willard. "The flats will consist of two, three, or four rooms, and will be fitted up with every modern arrangement for the convenience of occupiers, but will be without kitchens. The company will retain management of the central kitchen and cater for its tenants. Every flat will erate bachelor, is about to be married, have direct communication with the kitchen by means of an elevator, and at the same hour all the tenants will sit down to meals which, it is stated,, will not be more expensive than if the housewife were attending to them "In addition," continued Mr. Jaeger

fire, and turn the hot water into the highly successful and satisfactory."

upon, with a stroke of the pen, new maps were ordered for the Bolivian government and the Bolivian schools. showed more ocean than any other map ever printed. The British Isles had been sunk into the sea. And, so far as the people and school children of Bolivia are concerned, there is no Great Britain."

Hans Standiger, of Helsingfors, Finland, who is at the Shoreham, in speaking of the abolition of the liquor traffic ties of shyness, judged by fishermen's in Finland said that the declaration of parlance. The fish are said to be gut a famous English prelate, that he would in Finland said that the declaration of shy, hook shy, shy this and shy that, sooner see his country free than see it which indicates that the evolution along sober, appears to find little favor in Finland.

"If democratic institutions were synonymous with freedom," said Mr. Standiger, "the grand duchy of Finland, which now possesses the most democratic legislature in Europe, ought to be the freest country in the world. Its diet is a single hamber, the members of which are elect ed by a universal adult suffrage without distinction of sex, and it further enjoys the advantage, if such it be, of a pro-portional system of voting. It consists of 200 members, and no fewer than 740 The deer season closes to-day, and now candidates presented themselves at a re t may be safe to pick autumn leaves in cent election, 63 being women candidates of whom 19 were elected. There are several political parties in the grand duchy, and of these the Social Democratic party

appears to be by far the stronger.
"The diet seems to be the dernier cri of democratic tendencies in something like their ultimate development, for it is hard to see what further democratic nostrum remains to be exhibited; and therefore, if democracy and freedom are convertible terms, the grand duchy of Finland ought to be the most finished home of freedom in the world. Yet, if there is any truth in the famous episcopal antithesis between sobriety and freedom, this can hardly be the case The diet has passed a law which, if it ever becomes operative, will compel every inhabitant to be a total abstainer through sheer lack of the opportunity to obtain alcohol in any form. The measure amounts to a total prohibition of traffic in spirits, beer, or wine; and only for medical and technical purposes may spirits be produced, imported, while even for those purposes they are to be distributed as a state monopoly. No exemption is permitted even for the ecclesiastical use of wine in the communion.'

Shaving a Cause of Headache.

From the Boston Post. Dr. Paul Klager, a Viennese physician, delivered a sensational lecture before the medical society. He says the growing fashion of shaving the mustache is responsible for the growing number of patients suffering from headaches and dis eases of the repiratory organ. Out of 500 cases of serious headaches and diseases of the nose and throat, he had counted 420 patients who had their mustaches shaved off. The mustache is a natural protection for the nose against the invasion of cold air, dust, and microbes. Women, he says, are not so often in the streets, and wear veils to protect them-selves, and their nostrils are narrower

than those of men, The Difference.

From the Detroit Free Pres A man kicks if he has to wait twenty minutes for a woman, but often a woman will wait twenty years for a man without saying a word.
